
About Me

Associate Software Engineer passionate about building intelligent systems that solve real-world problems. I specialize in **AI/ML integration**, **full-stack development**, and **cloud-native architectures**.

 **Currently building:** [CivicShield AI](#) — World's first multi-agent AI platform for community emergency response

 **Learning:** Advanced LLM architectures, Microservices with Kubernetes, System Design

 **Interested in:** AI for social good, Scalable distributed systems, Open-source contributions

 **Goal:** Contributing to impactful products at a leading tech company

 **Fun fact:** I turn complex problems into elegant, scalable solutions

Featured Projects

Other Notable Projects

Project	Description	Tech Stack
 Asteroid Orbit Path Prediction	ML-powered asteroid trajectory prediction system	Python, Scikit-Learn, Pandas
 CivicShield AI	Multi-agent AI for community emergency response	TypeScript, Node.js, AI/ML
 AdaptiveFlow AI	Real-time cognitive process intelligence engine	Java, Spring Boot, Angular, AI
 SkillSync AI	AI-driven skill development & matching platform	TypeScript, Full-Stack
 Mobile Brand Classifier	AI classification of mobile phone brands	Python, Deep Learning

Achievements & Certifications

	Machine Learning Specialization		Completed
	AWS Cloud Practitioner		Certified
	Deep Learning Specialization		In Progress
	System Design Fundamentals		Learning

Professional Experience

	Associate Software Engineer
Full-stack development with Java, Spring Boot, Angular	
AI/ML integration in production systems	
Database design & API development	
Agile methodologies & CI/CD pipelines	
	AI & Machine Learning Projects
Built ML models for predictive analytics	
Implemented NLP solutions for text processing	
Deployed AI services at scale	
Real-time data processing pipelines	

Contribution Activity
